

## 75-meter Net Control Script

Rev 11/08/2024

At 6:45PM: Calling the Colorado 12th Region Traffic net (repeat 3-times)(do not mention KONTs)

This net meets on this frequency 3.989 Monday to Friday for the purpose of handing formal written traffic into and out of the Colorado 12th Region.

All stations licensed to operate on this frequency are welcome to check in.

This is (*your call in phonetics*) located near (*your location*)

Any stations with Emergency, Priority, Welfare , Time sensitive or Certified traffic for the net?  
(*pause and listen for stations*) Any Relays?

Net Control now calling only for stations with traffic. (*At this time take check in traffic stations, list their traffic*)

**Roll call: AZ, CO, NM, UT, WY, ID, MT, SD, NE, any other states.**

Net recognizes (*list the stations*)

(*Have the strongest station you can hear make a net call as propagation on frequency may favor another station, then another station at a different location if needed.*)

**(If any traffic check for/or assign stations to handle)**

(*Release all stations not needed to move traffic*)

(*Make one last net call; If no more stations for the net and traffic has been passed or directed to VHF Section Net then secure the net*)

The Colorado 12th Region Traffic Net meets on this frequency 3.989 Monday to Friday at 6:45PM local Mountain Time. All stations licensed to operate on this frequency are welcome to join.

This is (*your call*) closing the net at (*time*) local Mountain time and (*time*) UTC, 73, good evening.

*Log the number of check in stations and traffic to the KONTs web site. Also list the states checked in.*
